

**Pollution Prevention and Control Act 1999
The Environmental Permitting (England and Wales)
Regulations 2010**

Permit to operate a “Part B” Installation

Application received: 24/08/2012

Application reference: B 206

Seales Road Haulage Ltd. 7A Juliette Way, Purfleet Industrial Park, Purfleet, Essex RM15 4YD (Registered Office 14 Broadway Rainham Essex RM13 9YW) Company registration number 03049905. Is hereby permitted to operate a Part B installation as defined in Schedule 1, Section 3.5 part B of The Environmental Permitting (England and Wales) Regulations 2010.

The storage location of the permitted installation is situated at Land Known as Cyril Knowles Yard, Juliette Way, Purfleet Industrial Park, Purfleet RM15 4 YE As marked in red, (for identification purposes only) on the attached site location plan.

The installation hereby permitted involves the following activities

Activities in the Stationary Technical Unit	Schedule 1 References
The crushing and screening of bricks, tiles and concrete at demolition sites using mobile plant	Section 3.5 B(c)
Directly associated activities	Schedule 1 References
The crushing, grinding or other size reduction, other than the cutting of stone, or the grading or screening of any designated mineral or mineral product except where the operation of the activity is unlikely to result into the air of particulate matter.	Section 3.5 B (a)

The installation hereby permitted involves the crushing of bricks, tiles or concrete and the screening of the product of the crushing process, using mobile plant as described below

serial numbers	Plant Type
1232MO66238	Viper SA9000
PIDMETHALON65202	Terex Powerscreen MetroTrak 2012

A maximum of 1 Crusher and 1 screen will be in operation at any one time. This permit shall not be taken to permit the operation of any other installation including any other directly associated activity following within Section 3.5 of Schedule 1 of SI 1973.

The operator Seales Transport is authorised to operate the activity in England and Wales, subject to the following conditions.

Conditions

1. Asbestos shall not be crushed or screened.

Notifications

2. The operator shall, before the mobile plant is operated, notify the regulator of the site where the mobile plant is to be operated, and the regulator who issued the permit:
 - a. where and when the mobile plant is expected to start operating, and
 - b. the serial numbers of the mobile plant involved. (See appendix 2 for copy of simple notification form)
3. The operator shall submit to the regulator who issued the permit any changes to the list of permitted plant. The plant new to the list shall not be used until the regulator has approved the alteration to the list of permitted plant.

Emissions and monitoring

4. No visible particulate matter shall be emitted beyond the installation boundary.
5. The emission requirements and methods and frequency of monitoring set out in Table 1 shall be complied with. All monitoring shall be recorded in a log which shall be kept with the plant at all times together with a copy of the permit during operation.
6. All plant and equipment capable of causing, or preventing, emissions shall be maintained in accordance with the manufactures instructions. *Records shall be kept of such maintenance.*

Aggregates delivery and storage

7. Dusty materials (including dusty wastes) shall only be stored in Cyril Knowles Yard, Juliette Way, Purfleet Industrial Park, Purfleet RM15 4 YE as detailed on the drawing reference S1. attached to this permit and shall be subject to suppression and management techniques to minimise dust emissions.

Crushers and screening units

8. Crushers shall be totally contained or fitted with a water suppression system over the crusher aperture

9. Where the use of water as a method of dust suppression is necessary in order to meet the emission limits, it shall be used. In such circumstances, if water of the required pressure is not available for use on the suppression system, then the process shall not operate.

10. Deposits of dust on external parts of the plant shall be cleaned off at the end of each working day in order to minimise the potential for wind entrainment.

11. Processed materials likely to generate dust shall be conditioned with water prior to internal transfer.

Belt conveying

12. All dusty materials, including wastes, shall be conveyed using conveyors associated with the crusher covered with tarpaulin to reduce the potential for aerial emissions of dust.

. All transfer points shall be fitted with a chute at the end of the conveyor to direct the processed materials towards the ground to reduce the potential for aerial emissions.

Loading, unloading and transport

13. No potentially dusty materials (including wastes) or finished products shall arrive on or leave the site other than by use of sheeted vehicles when leaving or accessing the site.

Roadways and transportation

14. All areas where there is regular movement of vehicles shall have a consolidated surface capable of being cleaned, and these surfaces shall be kept clean and in good repair, or shall be kept wet. Quarry haul roads are excluded from this provision.

15. Vehicles shall not track material from the site onto the highway.

Records and training

16. Written or computer records of all tests and monitoring shall be kept by the operator for at least 24 months. They [and a copy of all manufacturer's instructions referred to in this permit] shall be made available for examination by the Council.

Records shall be kept of operator inspections, including those for visible emissions.

17. Staff at all levels shall receive the necessary training and instruction to enable them to comply with the conditions of this permit. Records shall be kept of relevant training undertaken

Best available techniques

18. The best available techniques shall be used to prevent or, where that is not practicable, reduce emissions from the installation in relation to any aspect of the operation of the installation which is not regulated by any other condition of this permit.

19. If the operator proposes to make a change in operation of the installation, he must, at least 14 days before making the change, notify the regulator in writing. The notification must contain a description of the proposed change in operation. It is not necessary to make such a notification if an application to vary this permit has been made and the application contains a description of the proposed change. In this condition „change in operation“ means a change in the nature or functioning, or an extension, of the installation, which may have consequences for the environment.

Table 1-Emission Limits, Monitoring and other Provisions

Substance	Source	Emission limit/Provisions	Type of monitoring	Monitoring frequency
Particulate matter	Whole Process	Avoidance of visible emissions crossing the (construction) site boundary	Recorded operator observations	On start up and at least two more occasions each day
Smoke	Engines	No visible smoke during normal operation	Recorded operator observations	On start up and at least two more occasions each day

Date 09/10/2012

Right to Appeal

You have the right of appeal against this permit within 6 months of the date of the decision. The Council can tell you how to appeal (See Guidance Note.) You will normally be expected to pay your own expenses during an appeal.

You will be liable for prosecution if you fail to comply with the conditions of this permit. If found guilty, the maximum penalty for each offence if prosecuted in a Magistrates Court is £50,000 and/or 6 months imprisonment. In a Crown Court it is an unlimited fine and/or 5 years imprisonment.

Our enforcement of your permit will be in accordance with the [Regulators' Compliance Code](#).

APPENDIX 1

Guidance Note

For the purposes of this document, the Local Regulatory Authority (LRA) is Thurrock Council

This permit is issued under Regulation 13 of the Environmental Permitting (England & Wales) Regulations 2010 (SI 2010/675) as amended ('the EP Regulations') to operate a facility carrying out one or more of the activities listed in Part 2 of Schedule 1 of those Regulations, to the extent authorised by the Permit.

The Permit includes conditions that must be complied with. It should be noted that aspects of the operation of the facility which are not regulated by those conditions are subject to an implied condition in that the Operator shall use the best available techniques (BAT) for preventing or, where that is not practicable, reducing emissions from the facility.

Techniques include both the technology used and the way in which the facility is designed, built, maintained, operated and decommissioned.

Your attention is drawn to the following publications that are relevant to your process:

- The Environmental Permitting (England & Wales) Regulations 2010.
- Process Guidance Note -PG 3/16 (12) – Mobile Crushing and Screening

Confidentiality

The Permit requires the Operator to provide information to the LRA. The LRA will place the information onto the public registers in accordance with the requirements of the EP Regulations. If the operator considers that any information provided is commercially confidential, application can be made to the LRA to have such information withheld from the register, as provided in the EP Regulations. To enable the LRA to determine whether the information is commercially confidential, the Operator should clearly identify the information in question and should specify clear and precise reasons.

Variations to the Permit

This Permit may be varied in the future. Any such variation will include summary details of this Permit, variations issued up to that point in time, and state whether a consolidated version of the Permit has been issued.

Surrender of the Permit

Before this Permit can be wholly or partially surrendered, an application to surrender the Permit has to be made. For the applicant to be successful, they would have to be able to demonstrate to the LRA, in accordance with Regulation 25 of the EP Regulations, that there is no pollution risk and that no further steps are required to return the site to a satisfactory state.

Transfer of the Permit or part of the Permit

Before the Permit can be wholly or partially transferred to another person, a joint application to transfer the Permit has to be made by the existing and the proposed holders, in accordance with Regulation 21 of the EP Regulations. A transfer will be allowed unless the LRA considers that the proposed holder will not be the person who will have control over the operation of the facility or will not ensure compliance with the conditions of the transferred Permit.

With specific regard to the temporary transfer of mobile plant permits then it is recognized that mobile plant authorised may often be hired out. The general principle being that the person undertaking a crushing operation using the permitted plant must hold an authorisation. There is the possibility that the plant is hired out complete with an a member staff from the hire company who will then operate the plant in accordance with the permit conditions, hence no transfer would be required or the plant could be hired out without an operative and in this case there would be the responsibility of the customer hiring the plant to have the necessary permit in place. It is possible to transfer a permit on a temporary/short term basis during the period of hire under Regulation 21. Short term users could effectively take over the responsibilities as an operator for a short fixed term period for complying with the conditions of the transferred permit. Should the plant not be operated in accordance with the conditions of the permit then the LRA could take enforcement action against the temporary user for any breach of the conditions for the period that the permit was registered with the temporary user.

General

This Permit is issued on the basis that the information provided by the applicant in support of the application for Permitting was neither false nor misleading. Any change affecting the accuracy of such information should be promptly notified, in writing, to the LRA at the contact address.

This Permit is issued in relation to the Pollution Prevention and Control Act 1999. It must not be taken to replace any responsibilities the operator has under workplace health and safety' legislation. Neither does it detract from any statutory requirement such as the need to obtain hazardous substances consent, discharge consent from the appropriate Water authority, Building Regulations approval, planning permission or any license or consent from the Environment Agency.

APPEALS AGAINST PERMIT CONDITIONS

Anyone who is aggrieved by the Conditions attached to this Permit can appeal to the Secretary of State for the Department for Environment, Food and Rural Affairs no later than 6 months from the date of the Permit. Any such appeal should be addressed to The Secretary of State for the Department for Environment, Food and Rural Affairs, The Planning Inspectorate, Environmental Pollution Appeals, Room 14/13 Tollgate House, Houlton Street, Bristol BS29DJ.

The appeal procedure is contained in Schedule 6 of the Environmental Permitting (England and Wales) Regulations 2010.

The appeal must be in the form of a written notice or letter stating that the person wishes to appeal and listing the Condition(s) which is/are being appealed against. The following items must be included:

- a) a statement of the grounds of appeal;

- b) a copy of any relevant application;
 - c) a copy of any relevant environmental permit;
 - d) a copy of any relevant correspondence between the person making the appeal ('the appellant') and the LRA;
 - e) a copy of any decision on notice which is the subject matter of the appeal;
- and
- f) a statement indicating whether the appellant wishes the appeal to be in the form of
 - a hearing or dealt with by way of written representation.

At the same time, the notice of appeal and documents (a) and (e) must be sent to the LRA, and the person making the appeal should inform the Secretary of State for the Department for Environment, Food and Rural Affairs that this has been done.

Please Note:

An appeal will not suspend the effect of the Conditions appealed against; the Conditions must still be complied with.

In determining an appeal against one or more Conditions, the Regulations allow the Secretary of State in addition to quash any of the other Conditions not subject to the appeal and to direct the LRA either to vary any of these other Conditions or to add new Conditions.
